SARA Receives UL 1069 Certification from Intertek Testing Services

Charlottesville, Va., December 19, 2007 — Status Solutions, provider of the Situational Awareness and Response Assistant (SARA), announces UL 1069 certification and receipt of the ETL Listed Mark. Administered by Intertek Testing Services, SARA has been approved to be installed in regulated critical care environments according to the Hospital Signaling and Nurse Call Equipment standard (UL 1069) set forth by the National Electrical Code, NFPA 70, and the Standard for Health Care Facilities, NFPA 99.

“Many assisted living, independent living and senior nursing facilities have benefited from installing SARA. With UL 1069 certification we can now extend SARA to critical care areas requiring compliance with regulatory standards,” states Mike MacLeod, Principal at Status Solutions.

During this certification process the SARA system has undergone strenuous testing and has met the necessary requirements to be installed in either general or critical care areas. This demonstrates SARA’s ability to bring both traditional nurse call elements, as well as current generation communication tools together into a single solution. SARA is the natural solution for communities looking to implement state of the art technology solutions across their entire campus regardless of the regulatory criteria required in certain areas. By obtaining UL 1069 certification Status Solutions can provide a scalable solution that will meet the needs of communities as they grow and change to meet the needs of the aging population.

About Status Solutions and SARA:

Status Solutions is a provider of vertical market solutions to the senior housing, education and government markets. Status Solutions is the developer of the SARA system which provides heightened awareness to these markets and their distinct requirements. Status Solutions accomplishes this through an established and expanding library of integrations to existing systems, as well as its own monitoring and alerting capabilities.

With a combination of skills in computer telephony integration, as well as practical experience in the delivery of monitoring and notification tools, Status Solutions is a focused growing company, with customer satisfaction as their top priority. Based on the success of customers located across the United States, Status Solutions doubled in size in 2006, and has continued along a similar growth path in 2007.

SARA is an automated alerting system which through a simple to use text to speech engine can send voice and text alerts to in-building pagers, email and telephones, as well as to cell phones, home phones and external email. This allows both staff and residents to be notified of important events at any time, any place. Staff members can quickly address safety and security concerns or environmental problems before they turn into emergencies.
